EXPERIENCE

Sr. FrontEnd Engineer

2025 – Present

MyFuels

Gurugram, India

- Headed the development of multiple mission-critical cross-platform iOS and Android apps leveraging **Expo React Native, Redux, with a Hasura GraphQL and PostgreSQL** backend within an **Agile** framework for the customers to order fuel.
- Implemented **multi-language support for local Indian languages**, increasing success rates for onboarding and **expanding the customer base by 55%**.
- Built pixel-perfect and buttery smooth UI leveraging native APIs leading to **12% increase in user retention rates**.
- Integrated payment gateways like Cashfree and Easebuzz, and third-party in-app integrations including Statiq, GlobalAssure and Zoho Support for extended service offerings including EV charging ,assistance and insurance solutions.

Software Engineer

2023 – 2024

FuelBuddy

Gurugram, India

- Developed scalable and high-performance and responsive **Progressive Web Apps (PWA)** and cross-platform apps leveraging **React, React Native, Redux, Vue, and GraphQL** for the delivery ,clients and operations teams creating a comprehensive fuel management ecosystem. This optimised workflow and resulted in a **27% boost in delivery efficiency**.
- Integrated **Mapbox** for tracking location and vehicle fuel metrics on our dashboard.This streamlined delivery routes, **reducing average delivery times by 50 minutes per order**.
- Spearheaded the front-end development of an **automated fuel dispensing system** in remote partnership with the IoT and operations teams based in UAE using **WebSockets, which increased dispensing accuracy by 32%**.
- Engineered real-time **dispenser stats fetching, e-lock control mechanisms, and RFID-based vehicle identification** for precise asset fueling leading to the **prevention of manual errors and reducing fuel pilferage by an estimated 5,900 liters per month**.
- While working on-site in **Dubai, UAE**, developed a **polymorphic codebase** to abstract integrations with **diverse dispenser models (Tokheim, Isoil, Veeder)** to accelerate feature implementation.

PROJECTS

SnipChat | *Quasar, Vue.js, Firebase, Mapbox GL JS, WorkBox, Vite*

- Developed a responsive Progressive Web App (PWA) for chatting utilizing Backend-as-a-Service (BaaS).
- Implemented real-time push notifications and service workers to enhance engagement and ensure offline functionality, addressing connectivity challenges.

SwissArmyKnife NewTab | *Vanilla Javascript, HTML/CSS*

- Built a Chrome extension that replaces the new tab page with a custom interface with real-time Bitcoin price, weather updates, and other productivity tools utilising many APIs including CoinGecko and OpenWeatherMap, for dynamic content like a random quote time the user opens a new tab.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, Python, SQL (Postgres), NoSQL, GraphQL, YAML, Markdown
Frameworks & Libraries: React, React Native, Next.js, Redux, Zustand, Expo, Framer, Vue.js, TailwindCSS, Material UI, Quasar, Electron, Node.js, MongoDB, Express, Firebase, Jest, Playwright, TanStack, Prisma, Redis
Tools & Technologies: Git, Docker, Vite, AWS, GCP, REST, Cursor, WordPress, ESLint, npm, Figma, Claude
Other Skills: Prompt Engineering, Agentic Coding, System Design, LLD, HLD, Full Stack, CI/CD, TDD, ADD

AWARDS

Performer of the Month

September,2023

Awarded for delivering critical business features within tight deadlines

EDUCATION

Jamia Hamdard University

Delhi, India

Bachelor of Technology in Computer Science Engineering , 8.6 CGPA

Aug. 2019 – April 2023
